

FIG. 1 is a perspective view of a device 10 in accordance with the present invention. The device 10 includes a base 12 and a top 14. The base 12 is a rectangular plate with a series of circular holes 16 arranged in a grid pattern. The top 14 is a rectangular plate that fits over the base 12 and has a series of circular holes 18 arranged in a grid pattern. The top 14 is secured to the base 12 by a series of screws 20. The device 10 is used to hold a sample 22 in place for analysis.
